JEEP® AVENGER DIMENSIONS

The Motor Distribution Ltd. reserve the right to make changes at any time, without notice, to prices, colours, materials, equipment, specification and versions and also to discontinue models. All details correct at time of going to print. Please consult your preferred Jeep Dealer for the most up to date information. This price / specification list is not a contractual document or offer of sale colours and photographs illustrated can be affected by many factors including technical settings and the printing process and are therefore for guidance only and may differ from a real life environment.

IMPORTANT NOTICE: Jeep Ireland endeavours to keep all pricing and specification up to date however final orders and products offered for sale may differ from those described or indicated in this document due to subsequent changes in specifications and / or component & supply constraints. The contents and descriptions are therefore to be treated as representations as to the current availability of products as described, or as to products actually offered for sale. Jeep Ireland, a trading name of Gowar.

These BEV model are electric (only) vehicles, as such, at the time of publication (1st November 2023) it qualifies for a VRT rebate and SEAI grant support valued at €3,500 for private retail customers which is included in the price.

Price excludes dealer delivery and related charges. Please consult your preferred Jeep Dealer for further information.

Actual boot capacity may vary by model.

All prices and product options are based on current information at time of publication approval (11/23). Visit Jeepavenger.ie for latest information.

*These figures were obtained after the battery had been fully charged. The Jeep® Avenger is a battery electric vehicle requiring mains electricity for charging. Figures shown are for comparability purposes. Only compare electric range figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, accessories fitted (post-registration), variations in weather, driving styles and vehicle load.

~Available from March 2023 production only.

Jeep® Avenger 1st EDITION Full Electric: CO2 emissions (weighted, combined) (g/km): 0. Electric energy consumption (weighted, combined) (kWh/100 km): 15,9; electric range 385-390 km (combined cycle). Values are calculated with the WLTP procedure (EU Regulation 2018/1832). The values indicated for energy consumption and electric range are measured by the manufacturer on pre-approval tests, according to the WLTP procedure (EU Regulation 2018/1832), and may be subject to modification depending upon the definitive homologation. The values indicated are for comparative purposes. Only compare CO2 and electric range figures with other cars tested to the same technical procedures. The Jeep® Avenger is a battery electric vehicle requiring These figures may not reflect real life driving results and the actual electric energy consumption values may be strongly different and may vary depending upon the conditions of use and on various factors such as: options, frequency of electric recharge per travelled kilometres, ambient temperature, driving style, speed, total weight, use of certain equipment (air conditioning, heating, radio, navigation, lights etc., tire types and conditions, road conditions, external climatic conditions, etc.

Prices, fuel consumption and CO2 emission figures are correct as of November 2023 and published to our dealer network which may be subject to change. Colours of vehicles shown may not match the actual colour.
